About Us

LOCAL HOME HEATING SERVICES

Your local home heating experts in Sussex and Surrey and surrounding areas.

Boilers ON-DEMAND is a local home heating company proudly serving homeowners across Sussex and Surrey. With over 36 years of industry experience, we've built a reputation for reliable workmanship, honest advice, and a responsive, customer-first approach. Whether you're upgrading an old system or need urgent support, our team delivers practical heating solutions tailored to your home and budget.

We provide a full range of home heating services, including new boiler installations, servicing and repairs, power flushing, and heat pump installations. As a Gas Safe registered company (575142), all work is carried out safely, efficiently, and to the highest standards. From improving energy efficiency to keeping your heating running smoothly all year round, Boilers ON-DEMAND is the trusted local choice for dependable home heating.

Our team of engineers is **Gas Safe** registered, so you can relax and know that you are in safe hands if we work on your appliance (s) at home or in your business. You should never take risks with gas, so we always recommend that our customers request to see the engineer's Gas Safe card before any work commences.

What are the benefits of a new energy efficient boiler?

There are several benefits of upgrading to a new energy-efficient boiler and we have showcased some of these below:

Savings

Upgrading to a new energy-efficient boiler can lead to significant cost savings as these boilers use less fuel to provide the same heat. This reduction in fuel consumption can translate to substantial savings on energy bills over time.

Environment

New energy-efficient boilers are a more environmentally friendly option, as they consume less fuel and produce fewer carbon emissions than older models. This helps to reduce your carbon footprint and its effect on the environment.

Performance

New boilers are more efficient, reliable, and durable. They heat up faster, operate quietly, and require fewer repairs, resulting in lower long-term costs. You also have the peace of mind of a new boiler guarantee if you have any future problems.

Our product focus

At Boilers On-Demand, we trust **Vaillant** for its 150+ years of innovation, quality, and sustainability. Their energy-efficient boilers deliver exceptional performance, reduce energy consumption, and promote eco-friendly living, making them perfect for modern, reliable home heating.

Vaillant ecoTEC Plus

The ecoTEC Plus is Vaillant's crown jewel in the combi boiler realm. Its output options are 26kW, 32kW, and 40kW.

- Outstanding ERP efficiency rating of A.
- A swift 5-second hot water delivery system.
- An internally-fitted filling loop maximising space.
- Aesthetically pleasing with a minimalist design.
- Compatible with smart thermostats like Google Nest and Hive.

Vaillant ecoFIT Pure

The ecoFIT Pure emerges as an optimal choice for those with space constraints. Its output options are 25kW, 30kW, and 35kW.

- Extremely compact, seamlessly fitting inside kitchen cupboards.
- Quiet Mark approved, ensuring peaceful operation.
- User-friendly LED display interface.

Vaillant ecoTEC Pro

The Vaillant ecoTEC Pro 24, 28, and 30kW combination boilers offer a compact, efficient, and reliable heating solution, ideal for small to medium-sized homes.

- Energy Efficiency: Up to 89.5% efficient, helping cut energy bills and reduce emissions.
- aquaCOMFORT System: Provides fast, consistent hot water while reducing waste.

Understanding your boiler options

Finding the right boiler for your home can be difficult, so our team of heating experts will help you choose the right boiler and accessories for your home and budget.

Combi Boiler

Provide heating and hot water from a single unit.

- ✓ Hot water on demand
- ✓ Compact designs
- ✓ Energy efficient

System Boiler

System boilers require a separate hot water tank.

- ✓ Sealed system
- ✓ No loft tank required
- ✓ For larger homes

Regular Boiler

Suitable for larger homes with multiple bathrooms.

- ✓ Easy to maintain
- ✓ Large storage capacity
- ✓ Requires tank in loft

FAQ's

Are you Gas Safe registered?

Yes, we are a Gas Safe registered business and you can verify directly with the gas safe register.

What is the guarantee available?

Your new Vaillant boiler can receive up to a 10-year guarantee. Our home surveyor will explain more about the guarantee if required.

What areas do you cover?

We provide our full array of services to customers in Sussex, Surrey and surrounding areas.

Are your prices competitive?

Yes, we actively research our local market to ensure that the pricing for all our services remain competitive.

Do you offer free quotations?

Yes, we will happily provide a free new boiler quotation, so please contact us to discuss further.

Boiler Servicing

A boiler service which focuses on ensuring your boiler and central heating system run as smoothly and efficiently as possible gives you peace of mind that your home's comfort is in good hands. The service usually takes less than an hour, though this will depend on the appliance.

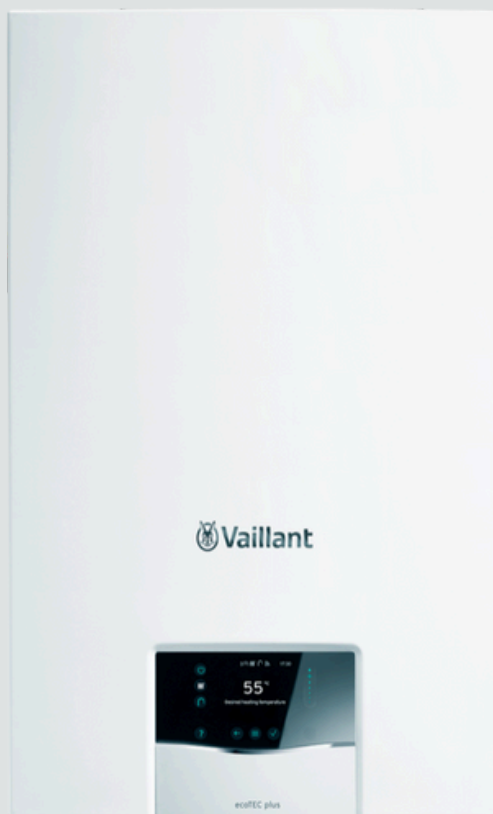

During the service, our professional Gas Safe engineer will follow a comprehensive boiler service checklist to ensure everything has been checked and is working well.

Testing the appliance following the manufacturer's instructions to ensure:

- The heat input and operating pressure are correct
- The effectiveness of the flue
- That all ventilation requirements are to current standards
- The proper operation of all safety devices and that the boiler is safe for continuous use

Final combustion analysis and measurement against tolerances set by the manufacturer's instructions.

A test of all disturbed gas connections. Carry out functional testing of heating and hot water. A visual inspection of any other encountered.

A visual inspection of the flue leaks / failing seals

Inspection and, where necessary, cleaning of the burner, combustion chamber, any injectors and heat exchanger.

Inspection of ignition devices, i.e. pilot lights and spark and flame-sensing electrodes. Checking the integrity of all seals and corrosion

Ensure that any condensate traps and drains are free from debris.

Written notification of any gas safety defects affecting your appliances' safe operation. An assessment of your current heating controls and best practice advice regarding energy efficiency Heating controls and best practice advice regarding energy efficiency
